Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

com.spilgames.framework.data.managers.ConfigurationsManager.ConfigurationManagerListener	6
com.spilgames.framework.Spil	11
com.spilgames.framework.data.Configurations	6
com.spilgames.framework.data.dao.ConfigurationsDAO	6
com.spilgames.framework.data.dao.impl.WebConfigurationsDAO	17
com.spilgames.framework.data.managers.ConfigurationsManager	7
com.spilgames.framework.data.managers.impl.ConfigurationsManagerImpl	7
com.spilgames.framework.core.parser.json.impl.ConfigurationsParser	8
Exception	
com.spilgames.framework.core.errorhandling.exceptions.NullHostException	10
com.spilgames.framework.core.server.FrameworkUrlHelper	9
com.spilgames.framework.core.Gender	9
com.spilgames.framework.core.SpilConstants	15
com.spilgames.framework.tracking.SpilTracker	15
com.spilgames.framework.tracking.impl.BaseTracker	5
com.spilgames.framework.tracking.impl.FlurryTracker	8
com.spilgames.framework.tracking.impl.GoogleAnalyticsTracker	9
com.spilgames.framework.tracking.impl.SetTracker	10
com.spilgames.framework.core.parser.json.impl.TrackingParser	16
com.spilgames.framework.tracking.TrackingSystems	16
com.spilgames.framework.core.server.UrlConstants	17
Activity	
com.spilgames.framework.ui.SpilActivity	14

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

com.spilgames.framework.tracking.impl.BaseTracker	5
com.spilgames.framework.data.managers.ConfigurationsManager.ConfigurationManagerListener	6
com.spilgames.framework.data.Configurations	6
com.spilgames.framework.data.dao.ConfigurationsDAO	6
com.spilgames.framework.data.managers.ConfigurationsManager	7
com.spilgames.framework.data.managers.impl.ConfigurationsManagerImpl	7
com.spilgames.framework.core.parser.json.impl.ConfigurationsParser	8
com.spilgames.framework.tracking.impl.FlurryTracker	8
com.spilgames.framework.core.server.FrameworkUrlHelper	9
com.spilgames.framework.core.Gender	9
com.spilgames.framework.tracking.impl.GoogleAnalyticsTracker	9
com.spilgames.framework.core.errorhandling.exceptions.NullHostException	10
com.spilgames.framework.tracking.impl.SetTracker	10
com.spilgames.framework.Spil	11
com.spilgames.framework.ui.SpilActivity	14
com.spilgames.framework.core.SpilConstants	15
com.spilgames.framework.tracking.SpilTracker	15
com.spilgames.framework.core.parser.json.impl.TrackingParser	16
com.spilgames.framework.tracking.TrackingSystems	16
com.spilgames.framework.core.server.UrlConstants	17
com.spilgames.framework.data.dao.impl.WebConfigurationsDAO	17

Chapter 3

Class Documentation

3.1 com.spilgames.framework.tracking.impl.BaseTracker Class Reference

Inheritance diagram for com.spilgames.framework.tracking.impl.BaseTracker:

Public Member Functions

- **BaseTracker** ([Configurations](#) configurations)
- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)
- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- int **getActiveSystems** ()
- void **startGesturesScreen** (String screenName)
- void **stopGesturesScreen** ()
- void **onStartTracking** (Activity context)
- void **onStopTracking** (Activity context)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/impl/BaseTracker.-java

3.2 com.spilgames.framework.data.managers.ConfigurationsManager.ConfigurationManagerListener Interface Reference

Inheritance diagram for com.spilgames.framework.data.managers.ConfigurationsManager.ConfigurationManagerListener:

Public Member Functions

- void **onConfigurationsRetreived** ([Configurations](#) configs)

The documentation for this interface was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/managers/ConfigurationsManager.java

3.3 com.spilgames.framework.data.Configurations Class Reference

Public Member Functions

- void **addAllConfigurations** ([Configurations](#) configs)
- void **addAllConfigurations** (Map< String, String > configs)
- void **addConfiguration** (String key, String value)
- String **getConfiguration** (String key)
- Set< String > **getKeys** ()
- boolean **containsKey** (String key)
- void **print** ()

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/Configurations.java

3.4 com.spilgames.framework.data.dao.ConfigurationsDAO Interface Reference

Inheritance diagram for com.spilgames.framework.data.dao.ConfigurationsDAO:

Public Member Functions

- [Configurations](#) **retrieveConfigurations** () throws ParseException, IOException, JSONException, NullHostException, CryptoException

The documentation for this interface was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/dao/ConfigurationsDAO.java

3.5 com.spilgames.framework.data.managers.ConfigurationsManager Interface Reference

Inheritance diagram for com.spilgames.framework.data.managers.ConfigurationsManager:

Classes

- interface [ConfigurationManagerListener](#)

Public Member Functions

- void **getConfigurations** ([ConfigurationManagerListener](#) owner)

The documentation for this interface was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/managers/ConfigurationsManager.java

3.6 com.spilgames.framework.data.managers.impl.ConfigurationsManagerImpl Class Reference

Inheritance diagram for com.spilgames.framework.data.managers.impl.ConfigurationsManagerImpl:

Public Member Functions

- **ConfigurationsManagerImpl** ([Configurations](#) configurations, ConnectionManager connMan, Crypto crypto)
- void **getConfigurations** ([ConfigurationManagerListener](#) owner)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/managers/impl/Configurations-ManagerImpl.java

3.7 com.spilgames.framework.core.parser.json.impl.ConfigurationsParser Class Reference

Public Member Functions

- [Configurations](#) **parse** (String webResult) throws JSONException

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/parser/json/impl/Configurations-Parser.java

3.8 com.spilgames.framework.tracking.impl.FlurryTracker Class Reference

Inheritance diagram for com.spilgames.framework.tracking.impl.FlurryTracker:

Public Member Functions

- **FlurryTracker** (String flurryKey)
- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)
- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- void **startGesturesScreen** (String screenName)
- void **stopGesturesScreen** ()
- void **onStartTracking** (Activity context)
- void **onStopTracking** (Activity context)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/impl/FlurryTracker.java

3.9 com.spilgames.framework.core.server.FrameworkUrlHelper Class Reference

Public Member Functions

- String **basicRequestUrl** ()

Static Public Member Functions

- static String **getConfigurationRequestUrl** ([Configurations](#) config) throws NullHostException
- static HttpEntity **getHttpEntityFromParams** (Map< String, String > parameters) throws UnsupportedEncodingException

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/server/FrameworkUrlHelper.java

3.10 com.spilgames.framework.core.Gender Enum Reference

Public Attributes

- **MALE**
- **FEMALE**

The documentation for this enum was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/Gender.java

3.11 com.spilgames.framework.tracking.impl.GoogleAnalyticsTracker Class Reference

Inheritance diagram for com.spilgames.framework.tracking.impl.GoogleAnalyticsTracker:

Public Member Functions

- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)

- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- void **startGesturesScreen** (String screenName)
- void **stopGesturesScreen** ()
- void **onStartTracking** (Activity context)
- void **onStopTracking** (Activity context)

Protected Member Functions

- **GoogleAnalyticsTracker** (String ganKey)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/impl/GoogleAnalyticsTracker.java

3.12 com.spilgames.framework.core.errorhandling.exceptions.NullHostException Class Reference

Inheritance diagram for com.spilgames.framework.core.errorhandling.exceptions.NullHostException:

Public Member Functions

- **NullHostException** (final String argMessage, final Throwable argCause)
- **NullHostException** (final String argMessage)
- **NullHostException** (final Throwable argCause)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/errorhandling/exceptions/NullHostException.java

3.13 com.spilgames.framework.tracking.impl.SetTracker Class Reference

Inheritance diagram for com.spilgames.framework.tracking.impl.SetTracker:

Public Member Functions

- **SetTracker** ([Configurations](#) configurations)
- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)
- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- void **startGesturesScreen** (String screenName)
- void **stopGesturesScreen** ()
- void **onStartTracking** (Activity context)
- void **onStopTracking** (Activity context)

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/impl/SetTracker.java

3.14 com.spilgames.framework.Spil Class Reference

Inheritance diagram for com.spilgames.framework.Spil:

Public Member Functions

- Map< String, Object > **getSubSystems** ()
- void **onConfigurationsRetreived** ([Configurations](#) configs)
- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)
- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- void **onStartTracking** (final Activity context)
- void **onStopTracking** (Activity context)

Static Public Member Functions

- static [Spil](#) **spilWithAppID** (String applicationID, String authToken, Map< String, String > configs)
- static [Spil](#) **getInstance** ()

3.14.1 Member Function Documentation

3.14.1.1 void com.spilgames.framework.Spil.trackAge (int *age*)

Track the age of the user is logged in the application. Useful for demographic information.

Parameters

<i>age</i>	The age to track.
------------	-------------------

3.14.1.2 void com.spilgames.framework.Spil.trackEndTimedEvent (String *event*)

Track requesto to register the end of an event that was started. If the tracking system support it natively the equivalent method will be used. Otherwise, an event with the end timestamp(epoch) is issued.

Parameters

<i>event</i>	The event to track. Should match with the starting event.
--------------	---

See Also

[trackTimedEvent](#):

3.14.1.3 void com.spilgames.framework.Spil.trackEndTimedEvent (String *event*, Map< String, String > *params*)

Track requesto to register the end of an event that was started. If the tracking system support it natively the equivalent method will be used. Otherwise, an event with the end timestamp(epoch) is issued.

Parameters

<i>event</i>	The event to track. Should match with the starting event.
<i>params</i>	The parameters when the event was finished.

See Also

[trackTimedEvent](#):

3.14.1.4 void com.spilgames.framework.Spil.trackError (String *event*, String *msg*, Exception *exception*)

Track request to register an error that has occurred in the application.

Parameters

<i>event</i>	The event to track.
<i>msg</i>	The message with the detail of the error.
<i>exception</i>	The exception that causes the error.

3.14.1.5 void com.spilgames.framework.Spil.trackEvent (String *event*)

Track request to register an event. The event could be actions taken on some object like unlocking an achievement, or a getting a hi score. In google analytics jargon they will be register as a "category"="event" and the event passed as parameter as the action taken. In flurry jargon, an event with parameters is created and the parameters match with google analytics (category,action,label,value)

Parameters

<i>event</i>	The event to track.
--------------	---------------------

3.14.1.6 void com.spilgames.framework.Spil.trackEvent (String *category*, String *action*, String *label*, long *value*)

Track request to register an event under a particular category. The parameters match with the google analytics' ones. For flurry, a event with parameters is issued.

Parameters

<i>category</i>	The category for this event.
<i>action</i>	The action took on that category.
<i>label</i>	Optional. A string label to specify something about the action.
<i>value</i>	Optional. A integer value. useful to specify error codes.

3.14.1.7 void com.spilgames.framework.Spil.trackEvent (String *category*, String *action*, String *label*, long *value*, Map<String, String> *params*)

Track request to register an event under a particular category. The parameters match with the google analytics' ones. For flurry, a event with parameters is issued.

Parameters

<i>category</i>	The category for this event.
<i>action</i>	The action took on that category.
<i>label</i>	Optional. A string label to specify something about the action.
<i>value</i>	Optional. A integer value. useful to specify error codes.
<i>params</i>	Optional. Additional parameters to attach to the event.

3.14.1.8 void com.spilgames.framework.Spil.trackEvent (String *event*, Map<String, String> *params*)

Track request to register an event with particular parameters. This match the Flurry's logEvent:withParameters:. It's not supported for GAN.

Parameters

<i>event</i>	The event to track
<i>params</i>	Additional parameters to attach to the event.

3.14.1.9 void com.spilgames.framework.Spil.trackGender (Gender *gender*)

Track the gender of the user is logged in the application. Useful for demographic information.

Parameters

<i>gender</i>	enum Gender MALE FEMALE
---------------	-------------------------

3.14.1.10 void com.spilgames.framework.Spil.trackLocation (Location *location*)

Track the location information of the player if it's available. If the tracking system support it natively the equivalent method will be used. Otherwise, an event with the information of the location (latitude, longitude, altitude and accuracy) is issued. The event format is: location set latitude, longitude, altitude, accuracy.

Parameters

<i>location</i>	The location where the device is.
-----------------	-----------------------------------

3.14.1.11 void com.spilgames.framework.Spil.trackPage (String *page*)

Track request to register a particular page. It can be used to keep track of the current screen separately from the events. If the session is not started yet, this request is ignored.

Parameters

<i>page</i>	The page name/url to track.
-------------	-----------------------------

3.14.1.12 void com.spilgames.framework.Spil.trackTimedEvent (String *event*)

Track request to register the start of an event that should end in a finite time. If the tracking system support it natively the equivalent method will be used. Otherwise, an event with the start timestamp(epoch) is issued.

Parameters

<i>event</i>	The event to track.
--------------	---------------------

3.14.1.13 void com.spilgames.framework.Spil.trackUserId (String *userId*)

Track the user ID that logged in the application. Useful to keep track of how many users return to the application.

Parameters

<i>userId</i>	The user ID to track.
---------------	-----------------------

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/Spil.java

3.15 com.spilgames.framework.ui.SpilActivity Class Reference

Inheritance diagram for com.spilgames.framework.ui.SpilActivity:

Public Member Functions

- void **onCreate** (Bundle savedInstanceState)
- void **onStart** ()
- void **onStop** ()

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/ui/SpilActivity.java

3.16 com.spilgames.framework.core.SpilConstants Class Reference

Static Public Attributes

- static final String **SG_ENVIRONMENT_KEY** = "SG_ENVIRONMENT_KEY"
- static final String **SG_APP_ID_KEY** = "SG_APP_ID_KEY"
- static final String **SG_AUTH_TOKEN_KEY** = "SG_AUTH_TOKEN_KEY"
- static final String **TRACKING_MOD_NAME** = "Tracking"
- static final String **TRACKING_SERVICE_FLURRY** = "flurry"
- static final String **TRACKING_SERVICE_MAT** = "mobile_app_tracking"
- static final String **TRACKING_SERVICE_GAN** = "google_analytics"
- static final String **TRACKING_SERVICE_SET** = "sg_event_tracker"
- static final String **TRACKING_SET_TIMEOUT** = "sg_event_tracker_timeout"
- static final String **TRACKING_SET_APPID** = "sg_event_tracker_appid"
- static final String **TRACKING_SET_CHANNELID** = "sg_event_tracker_channelid"
- static final String **TRACKING_SET_SITEID** = "sg_event_tracker_siteid"
- static final String **TRACKING_SET_SESSION_TIMEOUT** = "sg_event_tracker_session_expiration"

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/SpilConstants.java

3.17 com.spilgames.framework.tracking.SpilTracker Interface Reference

Inheritance diagram for com.spilgames.framework.tracking.SpilTracker:

Public Member Functions

- void **trackPage** (String page)
- void **trackEvent** (String event)
- void **trackEvent** (String category, String action, String label, long value)
- void **trackEvent** (String category, String action, String label, long value, Map< String, String > params)
- void **trackEvent** (String event, Map< String, String > params)
- void **trackTimedEvent** (String event)
- void **trackEndTimedEvent** (String event)
- void **trackEndTimedEvent** (String event, Map< String, String > params)
- void **trackError** (String event, String msg, Exception exception)
- void **trackUserId** (String userId)
- void **trackAge** (int age)
- void **trackGender** ([Gender](#) gender)
- void **trackLocation** (Location location)
- void **startGesturesScreen** (String screenName)
- void **stopGesturesScreen** ()
- void **onStartTracking** (Activity context)
- void **onStopTracking** (Activity context)

3.17.1 Detailed Description

Class to handle the tracking systems encapsulation. Currently, it works with Flurry and Google Analytics.

The documentation for this interface was generated from the following file:

- `/home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/SpilTracker.java`

3.18 `com.spilgames.framework.core.parser.json.impl.TrackingParser` Class Reference

Static Public Member Functions

- static void **parse** (JSONObject jsonTracking, [Configurations](#) configs) throws JSONException

The documentation for this class was generated from the following file:

- `/home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/parser/json/impl/TrackingParser.java`

3.19 `com.spilgames.framework.tracking.TrackingSystems` Enum Reference

Public Attributes

- **SG_TRACKING_FLURRY**
- **SG_TRACKING_GAN**
- **SG_TRACKING_MAT**
- **SG_TRACKING_GAW**
- **SG_TRACKING_SETI**
- **SG_TRACKING_EXT**

The documentation for this enum was generated from the following file:

- `/home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/tracking/TrackingSystems.java`

3.20 com.spilgames.framework.core.server.UrlConstants Class Reference

Static Public Attributes

- static final String **HOST_DEV_URL** = "http://native.spilgames.com"
- static final String **HOST_LIVE_URL** = "http://native.spilgames.com"
- static final String **HOST_STAGE_INTERNAL_URL** = "http://native-stg.spilgames.com"
- static final String **HOST_DEV_INERNAL_URL** = "http://natedev.spilgames.com.ignacio.developers.priv.-spillgroup.org"
- static final String **CONFIGURATIONS_URL** = "/settings/getunified/authtoken/%s/appid/%s/appversion/%s"

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/core/server/UrlConstants.java

3.21 com.spilgames.framework.data.dao.impl.WebConfigurationsDAO Class Reference

Inheritance diagram for com.spilgames.framework.data.dao.impl.WebConfigurationsDAO:

Public Member Functions

- **WebConfigurationsDAO** ([Configurations](#) configs, ConnectionManager connManager, Crypto crypto)
- [Configurations](#) **retrieveConfigurations** () throws ParseException, IOException, JSONException, NullHostException, CryptoException

The documentation for this class was generated from the following file:

- /home/jose/Projects/workspace/SpilFramework/src/com/spilgames/framework/data/dao/impl/WebConfigurationsDAO.java
